

STONWALK FLOOR SYSTEMS

STONHARD
CONSTRUCTION SOLUTIONS

COLOUR CHART

StonWalk is a seamless and slip-resistant bonded natural stone aggregate system, and is available in two grades, StonWalk SD (1-2mm) and StonWalk HD (2-4mm). It has been designed to ensure that walkways and external concourse areas reflect the natural beauty of the outdoors. StonWalk is ideally suited to outdoor environments subject to heavy footfall such as leisure complexes, theme parks, holiday resorts or other public areas of interest.

Sandbanks

Coral Rapids

Cypress Hills

Moonshine Lake

STONWALK SD

Sealed natural stone, UV stable, aggregate system with a permanent wet look.

STONWALK HD

Heavy-duty sealed natural stone, completely UV stable, aggregate system for added slip resistance.

An unsealed version of StonWalk is available on request. We do not recommend this in close proximity to buildings as aggregates tend to shed.

Colour matching available with additional lead time, minimum order requirements and a slight premium may apply.

Colour reproductions are as accurate as modern photography and quality printing methods can produce. For actual colour, see physical flooring sample. StonWalk is composed of natural stone, therefore colours may vary between batches. Natural, slight variations in colour add to the beauty of the system and should be expected.
