

GOLF & COUNTRY CLUB

JOB DETAILS:

MARKET:

Recreation

PRODUCT:

StonWalk SD

LOCATION:

London, Ontario

AREA:

Outdoor Patio

SUBSTRATE:

Prepared Concrete

The Challenge

This golf course and country club underwent a renovation project and added a second level patio overlooking the course. The customer was looking for a unique and visually appealing flooring system for this raised, outdoor area that could withstand the natural elements and constant foot traffic.

The Solution

The Stonhard team recommended our StonWalk system for this outdoor leisure space. StonWalk is a seamless and slip-resistant bonded natural stone

aggregate system. This unique system is designed to ensure that walkways and external concourses reflect the natural beauty of the outdoors. It is topped with a completely UV stable sealer for added durability and reduced aggregate “kick out”.

StonWalk is ideally suited to outdoor environments subject to heavy footfall, such as leisure complexes, resorts, theme parks and other public spaces. StonWalk is also available in a wide range of aggregate colour combinations.
